Avionics Technician transitioning into DevOps | Linux/Windows, Networking & Automation

Avionics Technician with 12+ years of international experience, transitioning into DevOps/SysAdmin roles. Strong background in mixed Linux/Windows environments, networking, and automation. Built solutions such as IoT dataloggers, automated backup systems, and aircraft tracking platforms. Looking to leverage my technical adaptability and operational discipline in cloud, on-premise infrastructure, and modern DevOps practices.

Language:

- Native Spanish
- Technical English

Recent work experience:

- The Helicopter company - Saudi Arabia (2024 - present)
- Helicópteros Marinos S.A. - Argentina (2014 - 2024)

Careers & Courses:

- Avionics technician degree (2012), Taller Regional Quilmes, Argentina.
- Coder house, web developer

Skills / Technologies:

- **Hypervisors:** Proxmox, VMware.
- **OS:** Linux (Arch, Debian, Rocky), windows (knowledge on AD - Failover config)
- **Databases:** MariaDB, postgresSQL, MongoDB.
- **Monitoring:** Zabbix, Grafana.
- **Networking:** DNS, DHCP, NAS, Iptables, OpenWRT, VLAN, OpenVPN, Wireguard.
- **DevOps:** git, terraform, ansible.
- **Cloud:** AWS, GCP
- **Mainframe:** Basic acknowledge on IBM mainframe and Z/OS / AIX
